AHMED MOHAMED SEDIK

Project Manager | PMP® | Capital Expansion & Project Governance

Jeddah, Saudi Arabia | +966 56 514 0371 | craftedbyahmad@gmail.com | PMI ID 12445740

Portfolio & playbook: ahmedsedikpm.github.io/project-manager

PROFESSIONAL SUMMARY

PMP® -certified Project Manager and mechatronics engineer specializing in capacity expansion: new plants, new production lines and the project governance that makes them repeatable. First dedicated project manager at a food manufacturer growing from 2 to 7 production lines; delivered five capital projects and built the company's project management framework from zero. Seeking industrial or capital Project Manager roles in Saudi Arabia or internationally.

CORE COMPETENCIES

Capital Project Management | Capacity Expansion | Project Governance & PMO Setup | Scope, Schedule & Cost Management | Earned Value Management (EVM) | Risk Management | Integrated Change Control | Stakeholder Management | Procurement & Vendor Management | Commissioning & Handover | Quality & Compliance | Cross-Functional Leadership | PMBOK® / Waterfall

PROFESSIONAL EXPERIENCE

Associate Project Manager, United Flowers for Vegetable Oils (UFVO) **May 2023 – Present**

Jeddah, Saudi Arabia | Food manufacturing | First dedicated PM during expansion from 2 to 7 production lines

- Delivered five capital expansion projects: New Cheese Plant, Shortening Production Line, Mayonnaise Production Line, New Oil Refinery Plant and Sauces Packaging Line.
- Increased production by 30% on the shortening line and by 20% on the sauces packaging line; the new cheese and mayonnaise lines opened new customers and new revenue for the company.
- Delivered the shortening line within budget despite a 3-week valve delay that threatened the critical path, by monitoring the risk register and triggering the contingency plan.
- Built the company's project management framework from scratch: charters, WBS standard, schedule and cost baselines, risk registers, change control board (CCB) procedure, stakeholder and procurement plans, and a lessons-learned process; applied on all five projects.
- Led engineers, technicians, vendors and contractors from initiation to handover: procurement of long-lead equipment, installation, food-grade quality checks, commissioning and transfer to operations.
- Controlled execution with schedule and cost baselines, earned value and variance analysis, integrated change control and risk monitoring; obtained sponsor acceptance and documented lessons learned on every project.
- Delivered food-grade installations including pasteurization, pressing and brining, high-pressure pumps, scraped-surface heat exchangers, nitrogen injection, automated dosing and PLC-integrated packaging.

Project Coordinator & Planner, Toshka Desert Water Transmission Pipeline Project **May 2022 – Apr 2023**

Aswan, Egypt | Government infrastructure | Team of 20+

- Coordinated engineers, technicians and contractors on pipeline construction and pump station installation.
- Tracked progress against scope, schedule and cost baselines; prepared work performance reports and variance analysis for senior management.
- Processed change requests through integrated change control, maintained the risk register, and managed closure and handover to operations.

CERTIFICATIONS & TRAINING

- Project Management Professional (PMP)®, Project Management Institute. Certification No. 4367900, valid 1 May 2026 – 1 May 2029.
- McKinsey Forward Program, McKinsey & Company. Leadership, strategy and management.
- PMP Exam Preparation, TIA Education Group. 35 contact hours, Oct 2025 – Mar 2026.

EDUCATION

Bachelor of Engineering, Mechatronics Engineering, October 6 University, Giza, Egypt | 2017 – 2021

TOOLS

Scheduling: Oracle Primavera P6, Microsoft Project, Smartsheet

Cost & Reporting: Excel (EVM, variance analysis), SAP (basics)
Documentation & Collaboration: Procore, AutoCAD (drawing review), Visio, Word, Teams, SharePoint, Outlook

LANGUAGES

Arabic (native) | English (advanced, professional)
